TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
Highlights	3
1. Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, May	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-May averages	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, May	8
4. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, May	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-May	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, April, with comparisons	14
7. Federal milk order Class I formula price information, May	18
8. Prices and economic indexes used in Federal milk order formulas to determine May prices, with comparisons	20
9. Federal order base and excess prices for milk of 3.5 percent butterfat content, May	21
10. Seasonal incentive fund excluded under various Federal milk orders, May	21
11. Filled and imitation milk sales in Federal milk order markets, March, April, and May 1968	21
Major order actions, May	22

HighlightsMAY 1968

Merger. The merger on May 1, 1968, of the former Nebraska-Western Iowa and Sioux City marketing areas into a single Nebraska-Western Iowa marketing area results in some adjustments of previously reported data. As has been done on all mergers, data for the former markets are combined and weighted to make them more nearly comparable to current data for the merged order. Also, because of the further expansion of the Nebraska-Western Iowa marketing area, it has been dropped from the list of comparable markets.

Producer Deliveries. A total of 124,539 producers delivered 4.7 billion pounds of milk to regulated handlers in 70 comparable markets during May 1968. This is 1.7 percent above producer deliveries in May 1967. Average daily delivery per producer increased from 1,164 pounds in May 1967 to 1,225 pounds in May of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 70 markets increased 0.4 percent from last year, to a total of 2.7 billion pounds for the month of May 1968.

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, increased 0.6 percent in the 70 markets for the month of May.

Percentage of Producer Deliveries Used in Class I. The average utilization percentage for May was 57 percent, down from 58 percent for May 1967. Thirty markets showed an increase in the utilization percentage, three showed no change, and the remaining 37 markets showed a decrease (See table 4).

Minimum Prices. The weighted average Class I price paid by handlers in the 70 markets for 3.5 percent milk was \$6.19 per hundredweight, 35 cents higher than the \$5.84 per hundredweight price in May 1967. Minimum Class I prices for May were higher in all 70 markets.

Producers in the 70 markets received a weighted average blend price of \$5.21 per hundredweight for 3.5 percent milk, 30 cents higher than the \$4.91 price received by producers in May 1967. Producers received a higher blend price in 64 markets and a lower price in the remaining six markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Fluid Milk Sales. Total in-area fluid milk sales for May 1968 in 69 marketing areas are estimated to be about 2.2 billion pounds, 0.7 percent above such sales in May of last year. Complete April in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

Filled and Imitation Milk Sales. Survey data of filled and imitation milk sales in Federal order markets, March, April, and May 1968 (See table 11).

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-May period for the 70 markets was \$5.95, 17 cents above the \$5.78 for the same period in 1967. The 1968 weighted average blend price was \$5.22, 16 cents higher than the blend price of \$5.06 reported for the period in 1967 (See table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first five months of this year, compared to the same period in 1967, producer deliveries for the 70 markets were unchanged, and deliveries used in Class I were up 0.7 percent. ^{1/} Data for the 70 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-May

Markets	Producer Deliveries			Deliveries used in Class I		
	1968	Change from 1967 2/		1968	Change from 1967 2/	
	1,000 lb.	1,000 lb.	Percent	1,000 lb.	1,000 lb.	Percent
70 Comparable markets ^{3/}	21,640,443	-2,632	0	13,734,038	+97,243	+ 0.7
3 Non-comparable markets ^{4/}	2,000,445	+351,573		1,193,042	+200,309	
73 All markets	23,640,888	+348,941	+ 1.5	14,927,080	+297,552	+ 2.0

^{1/} February 1968 data adjusted to 28 days before computing percentage change.

^{2/} February 1968 data adjusted to 28 days before computing changes in both pounds and percentages.

^{3/} Markets under continuous regulation since January 1, 1967, which have had no significant marketing area expansion.

^{4/} Massachusetts-R.I.-N.H., Nebraska-Western Iowa, and Minnesota-North Dakota.

1/ Volumes include 29-day totals for February 1968. The percentage changes are based on adjusted 28-day totals for February 1968 to make them comparable to 1967.

2/ Markets under regulation on January 1, 1967, and which have had no significant marketing area expansions. Excludes Massachusetts-R.I.-N.H., Nebraska-Western Iowa, and Minnesota-North Dakota.

3/ Class I plus Class II = 2,345,688 thousand pounds in 1968 and 2,466,125 thousand pounds in 1967; utilization = 53% in 1968 and 50% in 1967.

4/ Prior to merger with Sioux City, May 1, 1968.

* Represents number of markets reporting sales of one or more products. 1/ The survey information reported here may not reflect all sales of filled and imitation milks in all order markets. 2/ Unknown.

3/ Cedar Rapids-Iowa City, Central Arizona, Central Illinois, Cincinnati, Columbus, Corpus Christi, Eastern Colorado, Fort Wayne, Indianapolis, Miami Valley, Minneapolis-St. Paul, Nebraska-Western Iowa, New Orleans, New York-New Jersey, North Central Iowa, Northeastern Ohio, Northwestern Indiana, Northwestern Ohio, Oklahoma Metropolitan, Red River Valley, St. Louis, San Antonio, Southern Illinois, Southern Michigan, Tri-State, Upper Chesapeake Bay, Wheeling, and Youngstown-Warren.

Amendments:

50 Markets - May 1 (33 FR 6519, 4/30/68).

Appalachian	Inland Empire	Northeastern Ohio
Black Hills	Kansas City	Northeastern Wisconsin
Cedar Rapids-Iowa City	Knoxville	Northern Louisiana
Central Arizona	Louisville-Lex.-Evans.	Northwestern Indiana
Central Arkansas	Madison	Northwestern Ohio
*Central Illinois	Memphis	Oklahoma Metropolitan
Chattanooga	Miami Valley	Puget Sound
Clarksburg	Michigan Upper Peninsula	Quad Cities-Dubuque
Columbus	Milwaukee	Rio Grande Valley
Des Moines	Minneapolis-St. Paul	Rock River Valley
Duluth-Superior	Minnesota-North Dakota	St. Louis
Eastern Colorado	Mississippi	*Southern Illinois
Eastern South Dakota	Nashville	Texas Panhandle
Fort Smith	Neosho Valley	Tri-State
Fort Wayne	New Orleans	Wheeling
Great Basin	North Central Iowa	Wichita
Indianapolis	North Texas	

For the purpose of computing Class I prices in the above markets, the amendment provides that the basic formula price (Minnesota-Wisconsin) shall not be less than \$4.33 for the period from the effective date of this order through April 1969. For the same period, this amendment continues the 20-cent increase in the Class I price differential. The following 10 markets are similarly affected since their prices are based upon markets listed above: Austin-Waco, Central West Texas, Corpus Christi, Lubbock-Plainview, Ozarks, Paducah, Red River Valley, San Antonio, Western Colorado, and Youngstown-Warren.

*Other Class I pricing provisions, due to expire June 30, 1968, are extended through April 1969.

4 Markets - May 1 (33 FR 6519, 4/30/68).

Connecticut	Massachusetts-R.I.-N.H.
*Delaware Valley	New York-New Jersey

For the above markets whose Class I prices are computed from economic formulas, the amendment fixes the Class I price in each order for the period from the effective date of this order through April 1969 as follows: Connecticut, \$7.07; Delaware Valley, \$6.93; Massachusetts-Rhode Island-New Hampshire, \$6.67; and, New York-New Jersey, \$6.39. The Washington, D. C. and Upper Chesapeake Bay orders are similarly affected since their Class I prices are based upon the Delaware Valley Class I price.

*Other Class I pricing provisions, due to expire June 30, 1968, are extended through April 1969.

Cincinnati - May 1 (33 FR 6604, 5/1/68). Amendment revises the handler definition to include a cooperative association as a handler on farm bulk tank milk. To qualify for pooling, a distributing plant must have total route disposition of at least 50 percent of its receipts of Grade A milk from dairy farmers, from other pool plants which are assigned to Class I milk, from nonpool plants (excluding receipts of bulk fluid milk from other plants as Class II milk), and from cooperatives as handlers. At least 15 percent of such disposition must be on routes in the marketing area. (This percentage excludes receipts from other plants of packaged fluid milk products priced as Class I milk under this or any other Federal order.) A distributing plant meeting the 50 percent requirement in the previous month would continue as a pool plant in the current month even if such percentage is not met in the current month. The shipping requirements for a supply plant are revised to require that at least 50 percent of its Grade A milk from dairy farmers during the month be shipped to pool distributing plants. If this requirement is met during each of the months of September through February, the plant has automatic pool plant qualification for the following months of March through August.

Amendments: -Con.

Diversions by a cooperative association to nonpool plants would be limited to 35 percent of a cooperative's member milk received at pool distributing plants and by a proprietary handler to 35 percent of producer milk received at his plant, excluding milk diverted by a cooperative association.

Action provides for end-of-month inventory of packaged fluid milk products to be classified as Class I. Shrinkage provision revised to allow 0.5 percent shrinkage on receiving operation and 1.5 percent on processing operations.

For the purpose of computing the Class I price for the period from the effective date of this order through April 1969, the amendment provides for the basic formula price (Minnesota-Wisconsin) to be not less than \$4.33. Amendment adds 20 cents to the Class I differential for the period May 1, 1968 through April 1969. Action provides for the Class I price to be announced by the 5th day of the month to which it applies. The announcement date for the uniform price is changed from the 20th day to the 15th day after the end of the month. The Class I butterfat differential is changed to 0.120 times the Chicago butter price for the preceding month.

For plants located 50 but less than 60 miles from Cincinnati, the price is reduced 10 cents and 1.5 cents for each additional 10 miles or fraction thereof.

Nebraska-Western Iowa - May 1 (33 FR 6624, 5/1/68). Amendment merges the Nebraska-Western Iowa and Sioux City marketing areas and adds the following counties to the consolidated area: Antelope, Cedar, Dakota, Dixon, Knox, Pierce, and Thurston Counties in the State of Nebraska; and, Cass, Cherokee, Crawford, Fremont, Ida, Monona, Montgomery, O'Brien, Page, Plymouth, Pottawattamie, Sac, Shelby, Sioux, and Woodbury Counties in the State of Iowa.

Pooling requirements for a distributing plant are revised to provide that a distributing plant must dispose of at least 35 percent of its Grade A milk receipts from dairy farmers, supply plants, and cooperative associations on routes and that at least 15 percent of such receipts must be disposed of on routes in the marketing area. To qualify for pooling, a supply plant operated by a cooperative association must have at least 51 percent of its producer-member milk received during the month at pool distributing plants of other handlers. A handler or a cooperative association may divert the milk of any producer whose milk has been received at a pool plant on at least three days during the month. However, the total diversion would be limited to a volume not in excess of 15 percent of total producer milk receipts at all pool plants during the month.

A nonpool plant must be located not more than 200 miles from the nearest of Omaha, North Platte, or Scottsbluff, Nebraska, or Sioux City, Iowa or within 50 miles of the shipping plant, in order for a pool plant to receive classification in a class other than Class I for bulk transfers.

For the purpose of computing the Class I price for the period May 1, 1968 through April 1969, the amendment provides for the basic formula price (Minnesota-Wisconsin) to be not less than \$4.33. The Class I price is the basic formula price for the preceding month plus \$1.40 for pool plants located in Zone 1, plus \$1.30 in Zone 2, and plus \$1.55 in Zone 3. From May 1, 1968 through April 1969, this amendment adds 20 cents to the Class I differential for each zone.

For plants located more than 100 miles from the nearest of Chadron, Grand Island, Lincoln, Norfolk, North Platte, Omaha, and Scottsbluff, Nebraska, and Sioux City, Iowa, the price is reduced 1.5 cents for each 10 miles or fraction thereof.

Puget Sound - May 1 (33 FR 6229, 4/24/68). Amendment action eliminates the present order provisions which provide pool plant status to reload facilities. The point of pricing milk which is moved through a reload point is shifted from the reload point to the location of the plant where such milk is received and processed. Provision is also made for the proration of receipts among several handlers with respect to split deliveries of a bulk tank load of producers' milk.

Amendments: -Con.

Amendment divides the present Class II classification of manufactured milk products into two classes. Class II milk is all skim milk and butterfat used to produce ice cream, ice cream mix, frozen desserts, aerated cream products, plastic cream, soured cream dressing, yogurt, eggnog, cottage cheese, pot cheese, bakers cheese, cream cheese, neufchatel cheese, starter or any milk or milk products sterilized and packaged in hermetically sealed metal or glass containers, and condensed milk and skim milk not used to produce Class III products. Fluid milk products disposed of to commercial food processors are included in Class II. Class III milk is all skim milk and butterfat used to produce evaporated milk sterilized in sealed metal containers; condensed milk and condensed skim milk used to produce another Class III product in a pool plant or in a nonpool plant located within the marketing area or used to fortify Class I products in a pool plant. All skim milk and butterfat used to produce butter, nonfat dry milk solids, powdered whole milk, casein, and cheese (except that classified as Class II). All skim milk and butterfat used to produce any product other than a fluid milk product or a Class II product; dumped or disposed of for livestock feed; and, in shrinkage.

The Class II price is the Class III price plus 25 cents. The Class III price is the lower of the basic formula price (Minnesota-Wisconsin) or the butter-powder formula price. The butter-fat differentials for Class II and Class III would be the Chicago 93(92)-score butter price for the month times 0.120.

Amendment redefines certain location pricing districts in the market. Thurston and Grays Harbor Counties, now in District I where there are no applicable location adjustments, are included in the 15 and 20-cent per hundredweight location adjustment zones, respectively. Mason County (not a part of the designated marketing area) is changed from the zero location adjustment zone to a 15-cent per hundredweight zone, for location pricing purposes only. There are no changes in the boundaries of the defined marketing area.

St. Louis - May 1 (33 FR 6527, 4/30/68). Action deletes the supply-demand adjustor to the Class I price from the St. Louis order. The Ozarks, Southern Illinois, and Paducah orders are similarly affected since their prices are based upon the St. Louis Class I price.

Southern Michigan - May 1 (33 FR 6614, 5/1/68). Action removes portions of Allegan County, Michigan, from the marketing area. Amendment provides for three classes of milk instead of two. Class I milk is all skim milk and butterfat disposed of in the form of fluid milk products; in end-of-month inventory of packaged fluid milk products; and, not accounted for as Class II or Class III milk. Class II milk is all skim milk and butterfat used to produce cottage cheese and cottage cheese curd. Class III milk is all skim milk and butterfat: Used to produce any product other than a fluid milk product or cottage cheese; disposed of to commercial food processors; dumped or disposed of as livestock feed (including cottage cheese and cottage cheese curd); in frozen cream; in end-of-month inventory of bulk fluid milk products; and, in shrinkage.

For the purpose of computing the Class I price for the period May 1, 1968 through April 1969, the amendment provides for the basic formula price (Minnesota-Wisconsin) to be not less than \$4.33. The Class I price is the basic formula price for the preceding month plus \$1.40. Twenty cents is added to this price for the period May 1, 1968 through April 1969. This amendment deletes from the order, the supply-demand adjustor to the Class I price. The Class II price is the Class III price plus 15 cents. The Class III price is the lower of the basic formula price or the butter-powder formula price plus 10 cents.

Amendment expands the present area where plants are subject to direct-delivery differentials to include all of Wayne County (presently 13 townships are excluded) and two townships in Oakland County and establishes a differential of eight cents per hundredweight for plants in such area. Action also adds a second direct-delivery differential area of Oakland County (except two townships in eight-cent differential area) with a differential of four cents for plants in such area. The location adjustments are reduced for plants in various zones as follows: (a) Lenawee County changed from Zone 2, minus three-cent location adjustment to Zone 1, no adjustment, (b) eight townships in eastern Allegan County changed from Zone 5, minus nine-cent location adjustment to Zone 4, minus seven cents, (c) Huron County and the northern sections of Tuscola and Sanilac Counties changed from Zone 4, minus seven cents adjustment to Zone 3, minus five cents.

Amendments: -Con.

Upstate Michigan - May 1 (33 FR 6526, 4/30/68). For the purpose of computing the Class I price for the period from the effective date of this order through April 1969, the amendment provides for the basic formula price (Minnesota-Wisconsin) to be not less than \$4.33. Amendment adds 20 cents to the Class I differential for the period May 1, 1968 through April 1969. The Class II price is the lower of the Class III price plus 25 cents or the basic formula price plus 15 cents. Previously, the Class II price was the highest of the Midwest Condensery average price, the local plant average price, or the butter-powder formula price. The Class III price is the butter-powder formula price. The butter-powder formula in the order is: (Chicago 92-score butter price -3 cents x 4.2) plus (Chicago area spray price minus 5.5 cents x 8.2). Previously, the Class III price was the Class II price less 20 cents.

Western Colorado - May 1 (33 FR 6634, 5/1/68). Revised handler provision defines a handler as the operator of one or more pool plants, a partially regulated distributing plant, or an other order plant; a producer-handler or a cooperative association. A handler or a cooperative association may divert the milk of any producer from whom not less than 3 days' production was received during the month at a pool plant. The total quantity of milk so diverted may not exceed 60 percent, in the months of March through August and 30 percent in other months, of the total producer milk received during the month. Two or more cooperative associations may have their allowable diversions computed on the basis of the combined deliveries of milk by their member-producers.

Amendment redefines a producer-handler as any person, who operates a dairy farm and a distributing plant, and who receives no milk from other dairy farmers or from any source except by transfer from a pool plant. The amount of such products transferred and of nonfluid other source milk reconstituted into fluid milk products during the month shall not exceed the lesser of 5,000 pounds or 5 percent of said person's Class I utilization for the month.

To qualify for pooling, a distributing plant must dispose of at least 50 percent of its total receipts of Grade A milk (except receipts from distributing pool plants) on routes, and at least 10 percent of such receipts or 2,000 pounds per day, whichever is less, must be disposed of on routes in the marketing area. A supply plant must ship at least 50 percent of its Grade A milk to distributing pool plants. If the 50 percent requirement is met during each of the months of September through February, the plant has automatic pool plant qualification for the following months of March through August.

Amendment provides for three classes instead of two. Class I milk is all skim milk and butterfat disposed of in the form of fluid milk products, in end-of-month inventory of packaged fluid milk products, and not accounted for as Class II or Class III. Fortified fluid milk would be classified as Class I to the extent of the weight of an equal volume of milk, skim milk, or cream of the same butterfat content. Class II milk is all skim milk and butterfat used to produce cottage cheese. Class III milk is all skim milk and butterfat: Used to produce any product other than a fluid milk product or a Class II product; in fluid milk products or cottage cheese dumped or disposed of in bulk form for livestock feed; in skim equivalent of fortified products not accounted for as Class I; disposed of in fluid milk products in 2-gallon containers or larger to commercial food processors; in end-of-month inventory of bulk fluid milk products; and, in shrinkage.

Action establishes a basic formula price using the Minnesota-Wisconsin price series adjusted to a 3.5 percent basis by standard methods. The Class II milk price is the basic formula price for the month (Minnesota-Wisconsin) plus 5 cents. The Class III price is the basic formula price for the month, but not to exceed a butter-powder formula price.

The Class I butterfat differential is the Chicago 92-score butter price for the preceding month times 0.130. The Class II and Class III butterfat differential is the Chicago 92-score butter price for the current month times 0.120. The Producer butterfat differential is the weighted average of the Class I, Class II, and Class III butterfat differentials.
